18/02/2014

To do:
- synchronize the project in github;
- use the brazilian database because is online and we can use the same data;
- Modify the database.
  - New voucher field - eplanation.
  - New parcel field - vocher (only if exanged).
- When viewing an exchanged voucher get the information about the parcels.
- Integrate JP's code with my code.
- Correct english mistakes.
- the system should be able to modify where the parcel is and the expiration date.
